The Harvard Schools Trust, Inc.
P.O. Box 450
Harvard, MA 01451

To the Directors of The Harvard Schools Trust:

Thank you very much for your support of the AP Chemistry program, which has started this academic year at The Bromfield School. The College Board requires that students enrolled in AP Chemistry complete a rigorous and sophisticated laboratory program, which requires instrumentation and materials not commonly found in a high school setting. Thanks to your generous contribution, we now have high quality balances, an expanded array of Vernier probe technology, and other much-needed glassware and equipment. We now have an extremely well-equipped chemistry laboratory; the students and I are enjoying expanding our repertoire of lab skills as we launch this exciting and challenging new course.

Thanks to your organization, AP Chemistry students at The Bromfield School will participate in a college-level laboratory experience this year and for many years to come. It would not have been possible without your support.

Thank you again!

Sincerely,

A handwritten signature in black ink, appearing to read "Kristen B. VanderVeen". The signature is fluid and cursive, with a long horizontal flourish extending to the right.

Kristen B. VanderVeen, Ph.D.
Chemistry Teacher
